

The QPA method, implemented in the schools participating to the project *Tackling ESL in iVET*, has permitted a major involvement in the educational and training process of the students, who have had the opportunity to discover their own learning strategies, to improve their performances and to increase their intrinsic motivation.

INTERNATIONAL FINAL SEMINAR

The administration of the questionnaire QPA through an interactive way has motivated a respectful trust between students and teachers; it has permitted the use of didactic strategies and collaborative methodologies of tutoring, giving the possibility to students with difficulty to be helped to manage their own learning and to come out from isolation which could lead them to failure and early school leaving.

The QPA method

New ways to support and motivate
iVET students
at particular risk of ESL

Grant agreement code 2013-1-IT1-LEO05-04004
CUP G63D13000400006

The learning process oriented to the training and school success, starting from the awareness of their own learning strategies and from their strength leads to a completed competency learning: "learn to learn".

The school, a place of intercultural meeting, of growth, of learning, has to succeed in making the students feel independent and aware of their own learning and in being active protagonists at school and in the society.

SEMINAR LOCATION: USMI
Via Zanardelli, 32 - 00186 Roma
